## Fix Pack Contents

Installation of this fix pack will fix the following issues, the details of which are outlined below.

- IS-3937
- IS-3941

# 2

---

## Description of Issues Fixed

The application of this update addresses the following issues.

### **IS-3937: Date Filters created with Computed Fields containing null record do not sort properly**

During user acceptance testing, it was discovered that Filter Dashlets created using a Computed Field and containing null values would not sort their values properly. This issue has been fixed.

### **IS-3941: Dashlet null filter not working properly in Visualizer Mode**

During user acceptance testing, it was discovered that static filters used inside of a Dashlet's Visualizer mode (i.e, editing mode) would not properly filter the Dashlet in view mode, if the filters contained null values and null was selected. This issue has been fixed.
