Fix Pack Contents

Installation of this fix pack addresses the following issues, the details of which are outlined below.

- IS-5112
- IS-5096

2

Description of Issues Fixed and Enhancements

The application of this update addresses the following issues.

IS-5112: Execute of analysis job hung

During testing, analyses were discovered to be hanging due to a deadlock issue. This issue has been fixed.

IS-5096: .dat file already exists error

During testing, it was discovered that some executions would randomly throw an error and fail due to Hadoop/Spark attempting to output to a folder that already exists in Amazon S3. This was identified to be due to S3's 'eventually consistent' file system. To fix this, a code change has been made so that Hadoop will always write to a new folder, and never fall into a situation where a folder it is outputting to already exists.
